Number bonds to 10

I can... find pairs of numbers that make 10.

A number bond is two numbers that make a total. 7 and 3 make 10.

If you know $7 + 3 = 10$, you also know $3 + 7 = 10$ and $10 - 3 = 7$.

Top tip: Use your fingers: 10 fingers make 10.

Number bonds to 20

I can... find pairs of numbers that make 20.

Use bonds to 10 to find bonds to 20. $6 + 4 = 10$, so $16 + 4 = 20$.

You can also say $20 - 16 = 4$.

Top tip: Look at the ones digit. It needs a bond to 10.

One more and one less

I can... find one more and one less than a number to 100.

One more means the next number when you count. One more than 35 is 36.

One less means the number before. One less than 35 is 34.

Adding to 20

I can... add one-digit and two-digit numbers to 20.

To add, start with the bigger number and count on. For $8 + 5$, start at 8 and count on 5: 9, 10, 11, 12, 13.

You can also make 10 first: $8 + 2 = 10$, then $10 + 3 = 13$.

Top tip: Start with the bigger number.

You can also go back to 10 first: $13 - 3 = 10$, then $10 - 1 = 9$.

Missing number problems

I can... find a missing number in an add or subtract number sentence.

The box $\square$ is a missing number. The = sign means both sides have the same value.
