Adding and subtracting ones

I can... add and subtract ones to and from a 2-digit number.

When you add ones, only the ones digit changes, unless you cross a ten. $43 + 5 = 48$.

When you cross a ten, make the next ten first. $47 + 6$: $47 + 3 = 50$, then $50 + 3 = 53$.

Top tip: Use your number bonds to 10.

Worked example

$$56 + 7 = \boxed{63}$$
