Early Learning Goals

The Early Years Foundation Stage Profile summarises and describes children's attainment at the end of the Foundation Stage. It is based on on-going observation and assessment in the three prime and four specific areas of learning, and the three learning characteristics, set out below:

The prime areas of learning:

- communication and language
- physical development
- personal, social and emotional development

The specific areas of learning:

- literacy
- mathematics
- understanding the world
- expressive arts and design

The learning characteristics:

- playing and exploring
- active learning
- creating and thinking critically

The expectation is that by the end of the Reception year children will achieve the Early Learning Goal for each area of learning and will have reached an expected good level of development. Those children that do not achieve the Early Learning Goal will be assessed as emerging, and for those children that go beyond the Early Learning Goal they will be assessed as exceeding the level of development.

Communication and language development involves giving children opportunities to speak and listen in a range of situations and to develop their confidence and skills in expressing themselves.

ELG 01 Listening and attention:

Children listen attentively in a range of situations. They listen to stories, accurately anticipating key events, and respond to what they hear with relevant comments, questions or actions. They give their attention to what others say and respond appropriately, while engaged in another activity.

ELG 02 Understanding:

Children follow instructions involving several ideas or actions. They answer 'how' and 'why' questions about their experiences and in response to stories or events.

ELG 03 Speaking:

Children express themselves effectively, showing awareness of listeners' needs. They use past, present and future forms accurately when talking about events that have happened or are to happen in the future. They develop their own narratives and explanations by connecting ideas or events.

Physical development involves providing opportunities for young children to be active and interactive, and to develop their coordination, control, and movement. Children must also be helped to understand the importance of physical activity, and to make healthy choices in relation to food.

ELG 04 Moving and handling:

Children show good control and coordination in large and small movements. They move confidently in a range of ways, safely negotiating space. They handle equipment and tools effectively, including pencils for writing.

ELG 05 Health and self-care:

Children know the importance for good health of physical exercise and a healthy diet, and talk about ways to keep healthy and safe. They manage their own basic hygiene and personal needs successfully, including dressing and going to the toilet independently.

Personal, social and emotional development involves helping children to develop a positive sense of themselves and others; to form positive relationships and develop respect for others; to develop social skills and learn how to manage their feelings; to understand appropriate behaviour in groups; and to have confidence in their own abilities.

ELG 06 Self-confidence and self-awareness:

Children are confident to try new activities, and to say why they like some activities more than others. They are confident to speak in a familiar group, will talk about their ideas, and will choose the resources they need for their chosen activities. They say when they do or don't need help.

ELG 07 Managing feelings and behaviour:

Children talk about how they and others show feelings, talk about their own and others' behaviour, and its consequences, and know that some behaviour is unacceptable. They work as part of a group or class, and understand and follow rules. They adjust their behaviour to different situations, and take changes of routine in their stride.

ELG 08 Making relationships:

Children play cooperatively, taking turns with others. They take account of one another's ideas about how to organise their activity. They show sensitivity to others' needs and feelings, and form positive relationships with adults and other children.

Literacy development involves encouraging children to read and write, both through listening to others reading, and being encouraged to begin to read and write themselves. Children must be given access to a wider range of reading materials – books, poems, and other written materials, to ignite their interest.

ELG 09 Reading:

Children read and understand simple sentences. They use phonic knowledge to decode regular words and read them aloud accurately. They also read some common irregular words. They demonstrate an understanding when talking with others about what they have read.

ELG 10 Writing:

Children use their phonic knowledge to write words in ways which match their spoken sounds. They also write some irregular common words. They write sentences which can be read by themselves and others. Some words are spelt correctly and others are phonetically plausible.

Mathematics development involves providing children with opportunities to practise and improve their skills in counting numbers, calculating simple addition and subtraction problems, and to describe shapes, spaces, and measures.

ELG 11 Numbers:

Children count reliably with numbers from 1 to 20, place them in order and say which number is one more or one less than a given number. Using quantities and objects, they add and subtract two single-digit numbers and count on or back to find the answer. They solve problems, including doubling, halving and sharing.

ELG 12 Shape, space and measures:

Children use everyday language to talk about size, weight, capacity, position, distance, time and money to compare quantities and objects and to solve problems. They recognise, create and describe patterns. They explore characteristics of everyday objects and shapes and use mathematical language to describe them.

Understanding of the world involves guiding children to make sense of their physical world and their community through opportunities to explore, observe and find out about people, places, technology and the environment.

ELG 13 People and communities:

Children talk about past and present events in their own lives and in the lives of family members. They know that other children don't always enjoy the same things, and are sensitive to this. They know about similarities and differences between themselves and others, and among families, communities and traditions.

ELG 14 The world:

Children know about similarities and differences in relation to places, objects, materials and living things. They talk about the features of their own immediate environment and how environments might vary from one to another. They make observations of animals and plants and explain why some things occur, and talk about changes.

ELG 15 Technology: Children recognise that a range of technology is used in places such as homes and schools. They select and use technology for particular purposes.

Expressive arts and design involves supporting children to explore and play with a wide range of media and materials, as well as providing opportunities and encouragement for sharing their thoughts, ideas and feelings through a variety of activities in art, music, movement, dance, role play, and design and technology.

ELG 16 Exploring and using media and materials:

Children sing songs, make music and dance, and experiment with ways of changing them. They safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function.

ELG 17 Being imaginative:

Children use what they have learnt about media and materials in original ways, thinking about uses and purposes. They represent their own ideas, thoughts and feelings through design and technology, art, music, dance, role play and stories.

Playing and exploring - engagement

Finding out and exploring is concerned with the child's open-ended hands-on experiences which result from innate curiosity and provide raw sensory material from which the child builds concepts, tests ideas and finds out. Using what they know in their play describes how children use play to bring together their current understandings, combining, refining and exploring their ideas in imaginative ways. Representing experiences through imaginative play supports the development of narrative thought, the ability to see from other perspectives, and symbolic thinking. Being willing to have a go refers to the child finding an interest, initiating activities, seeking challenge, having a 'can do' orientation, being willing to take a risk in new experiences, and developing the view of failures as opportunities to learn.

Active learning – motivation

Being involved and concentrating describes the intensity of attention that arises from children concentrating on following a line of interest in their activities. Keeping on trying refers to the importance of persistence even in the face of challenge or difficulties an element of purposeful control which supports resilience. Enjoying achieving what they set out to do refers to the reward of meeting one's own goals, building on the intrinsic motivation which supports long-term success, rather than relying on the approval of others.

Creating and thinking critically – thinking

Having their own ideas: covers the critical area of creativity - generating new ideas and approaches in all areas of endeavour. Being inventive allows children to find new problems as they seek challenge, and to explore ways of solving these.

Using what they already know to learn new things: refers to the way in which children develop and link concepts, find meaning in sequence, cause and effect and in the intentions of others through both narrative and scientific modes of thought.

Choosing ways to do things and finding new ways: involves approaching goal-directed activity in organised ways making choices and decisions about how to approach tasks, planning and monitoring what to do and being able to change strategies.
